

Accessibility untamed.night (english)

Spatial accessibility

The entrance to the room is at ground level and wheelchair accessible. The interior is completely flat and the bar has a high element that is 140cm high and 9m long and a low element that is 98cm high and 140cm long. The playground is also wheelchair-accessible, but the lighting conditions are darker than on the main floor. A wheelchair-accessible toilet is available with a door that most people can open independently (no automatic door). All toilets on site are gender-neutral. The hand-drying machines in the toilet are loud and the lighting conditions are very bright.

Sensory stimuli

No strobe lighting will be used at the event. However, there will be moving lights in dark lighting conditions to create a party atmosphere. There will be a photo box that uses a flash. At the moment (08.10.24) there is no information available on specific effects for performances. These will be added online as they become available. Loud music will be played throughout the event. A maximum volume of 93 decibels will be reached. Earplugs and Pamir headphones will be provided. It is recommended that you bring your own headphones if necessary (e.g. noise-cancelling).

Unfortunately, no rooms can be offered that can be used as a quiet room and equalisation zone.

Accessibility for blind and visually impaired people

The bar menu is only available in flat German. The Stall6 team has received input to provide the map in Braille. An audio description of the room will be made available online before and during the event. This is not yet online at the moment (8th of October). There will be a moderator to guide you through the evening and provide auditory orientation.

Accessibility for hearing impaired people

The programme will be available in printed form at the event and will also be available online on the website and on Instagram beforehand. There will also be a guide to the individual performances. This will be distributed on site.

Further information on the programme

Cloakroom

The cloakroom will not be supervised during the event and no liability will be accepted for lost items. There is also no changing room, but you can change in the corridor or in the toilet.

Awareness concept

The awareness concept will be made available in a separate document. An awareness team and a security team will be present throughout the event.

Languages

The event will be moderated in Swiss German. The concepts will be made available in German and English. The awareness team speaks German and English.

Masks

FFP2 masks will be available for purchase at the entrance and at the bar.

Assistance animals

Assistance animals are allowed. However, please note that there will be loud music playing throughout the evening and there will be dark, changing and moving lighting conditions.
